

POLLUTION REVOLUTION

How To Combat Air and Plastic Pollution

AIR POLLUTION FACTS

The main sources of pollution

Production

waste from various industries, agriculture, metallurgy, chemical production

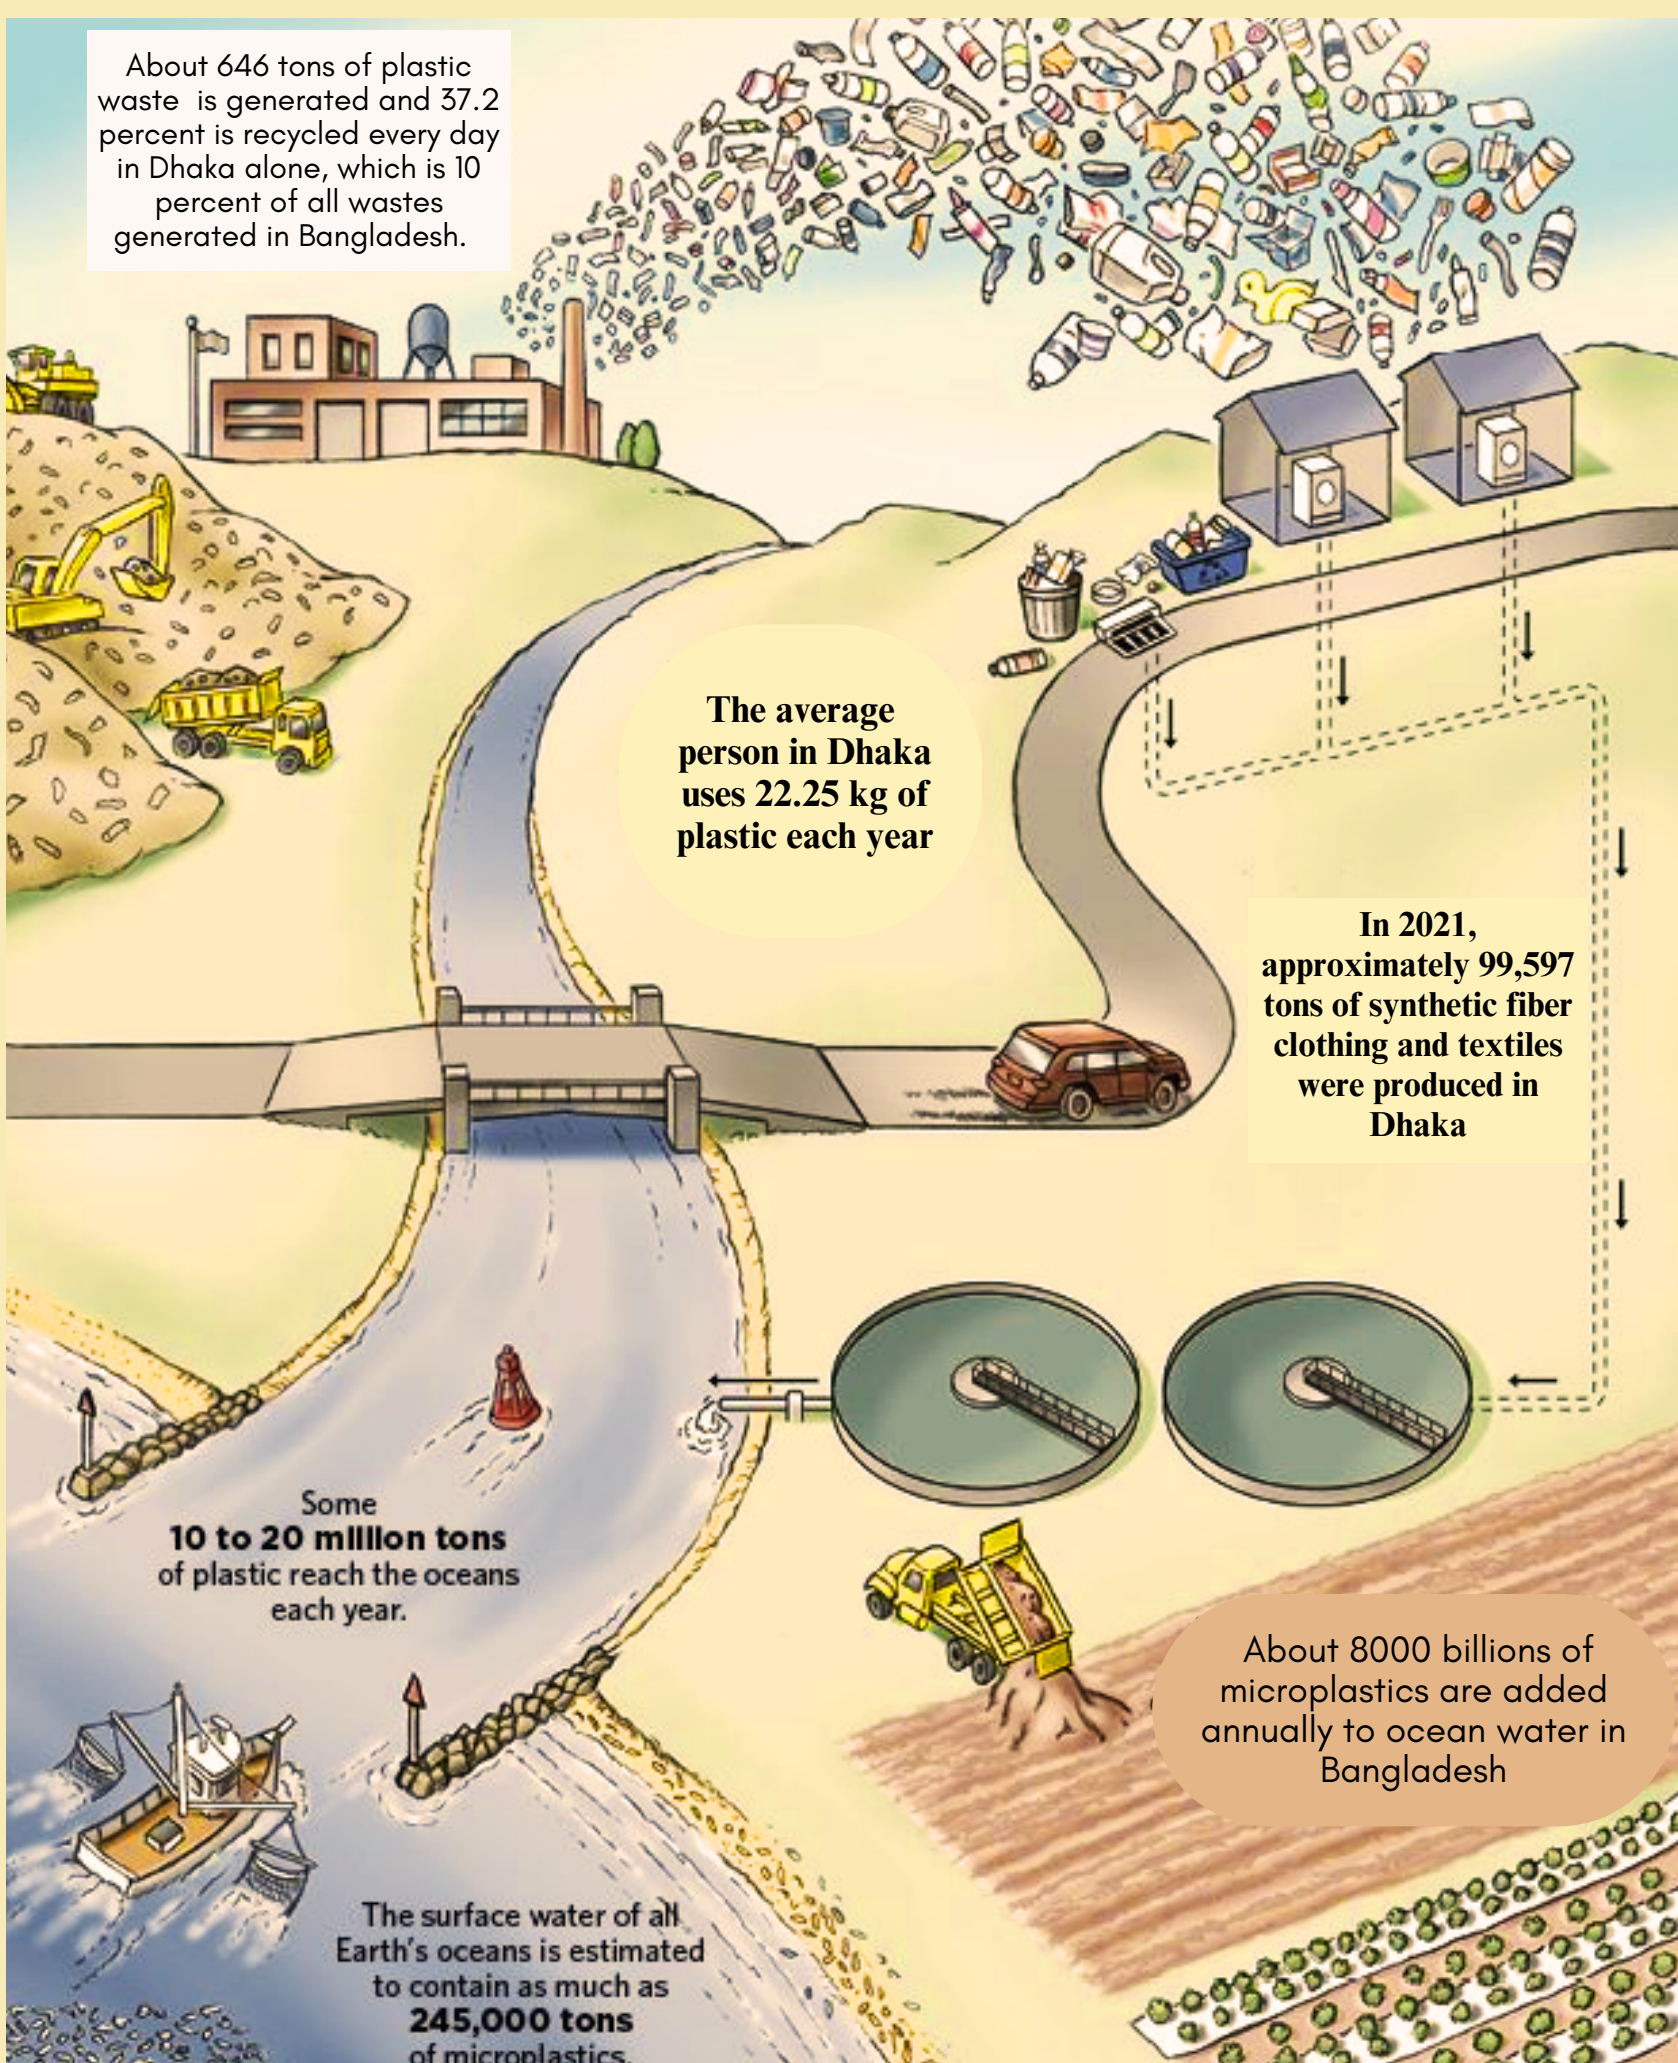

Household

recycling of household waste, burning fuel for housing

Transport

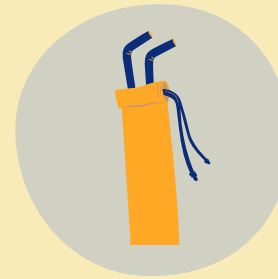

waste arises as a result of the operation of machines and vessels

A scenario of plastic pollution in Dhaka

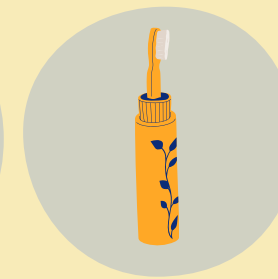

Plastic: Useful for minutes, harmful for decades.

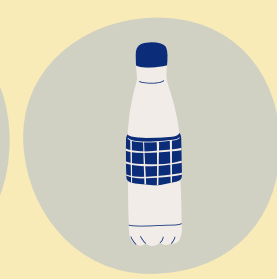

While a plastic item may only be useful to us for minutes, it takes decades to break down in the ocean.

Plastic straws:
200 years to break down.

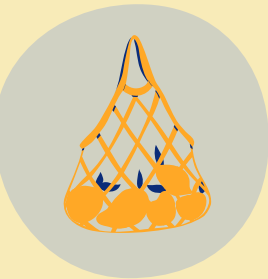

Plastic toothbrush:
500 years to break down.

Plastic bottles:
450 years to break down.

Coffee cups:
30 years to break down.

Plastic bag:
20 years to break down.

We need to reduce

AIR POLLUTION

How to make the air cleaner?

- 01 To take care of the "green lungs" - forests, parks, squares
- 02 Reduction of industrial emissions
- 03 Switching to alternative fuels
- 04 Reduction of chemical additives in agriculture
- 05 Waste disposal programs
- 06 Use of alternative energy sources

solution for reducing plastic pollution

TIP : CARE FOR THE ENVIRONMENT WHILE CARING FOR YOURSELF

Support a bag tax or ban

Bring your own garment bag to the dry cleaner

Wean yourself off disposable plastics

Put pressure on manufacturers

Purchase items secondhand

Boycott microbeads

Buy in bulk

Recycle

Say no to plastic.
